

CUSTOM MADE. MISSION READY.

LOOKING FOR CUSTOMIZED ENGINEERING SOLUTIONS?

If so, we're here to help. Applied Technology has been providing specialized development engineering products for the US federal government for over 65 years. Our innovative and integrated solutions are designed around your mission's needs to help you stay ahead of your adversaries, outsmart them and win the battle across the spectrum terrain.

RELY ON US TO DELIVER

We're the custom engineering arm of Motorola Solutions, one of the world's most trusted communication brands. From ISR (Intelligence, Surveillance and Reconnaissance) to SIGINT (Signal Intelligence), Special Communications and EW (Electronic Warfare), our hardware and software services have made the difference between mission accomplished and mission failed.

TALK TO US

If you're looking to take on a tough challenge with a specialized solution, get in touch. Our highly skilled engineers and system experts are ready to respond rapidly to your needs and deliver the right solution for your mission. **Contact us at ATInfo@MotorolaSolutions.com**

HERE'S WHAT WE DO

COLLABORATIVE CUSTOMER ENGAGEMENT

We partner with you to create cutting-edge proofs of concept and bring them to reality in our in-house factory.

SOFTWARE DEFINED RADIO

Software upgradeable capabilities on a common platform that scale to meet the mission.

ARTIFICIAL INTELLIGENCE

Machine learning expertise helps us create products with fast, reliable insights and actions.

MADE FOR THE MISSION CELLULAR DEVICES

Cellular modems and handsets leveraging commercial technology, custom software and packaging tailored for the mission.

CUSTOM ICS, SMART ANTENNAS AND RF

Smart Antenna and RF Systems that leverage our own custom ICs and the latest commercial technologies for industry leading performance.

INTUITIVE USER INTERFACE

Our intuitive user interfaces integrate data across multiple applications to streamline operations.

SIZE, WEIGHT AND POWER

We design SWaP optimized solutions for handheld use, manpacks and even group 1 UAS.
