GENERATE NEW VEHICLE LEADS

INTEGRATED RECORDS MANAGEMENT
& LICENSE PLATE RECOGNITION SOFTWARE

Your investigators' time is critical. Being forced to rely on manual searches and disconnected systems can slow them down. As more data is captured, it must be easy to recognize connections and access information in order to leverage it to its fullest potential.

HOW IT WORKS

With a records management system fully integrated with license plate recognition (LPR), when you input license plate information for a vehicle of interest in the incident record, your LPR database is automatically queried. The system will then indicate if any historical detection data exists, saving valuable investigative time. All relevant license plate data gathered by your LPR camera systems can be immediately viewed along with LPR data from other agency partners that you have access to. From there, conduct additional analysis to identify associated vehicles or proactively determine where a vehicle might be to generate leads and close more cases.

KEY BENEFITS

IMMEDIATE DATA AWARENESS
Upon entering a license plate into your incident record, immediately see if any relevant LPR data exists.

EASY ACCESS TO INTELLIGENCE
With two clicks, open a search result for your license plate. No additional sign on or querying required.

REDUCE IRRELEVANT SEARCHES
Don't waste time aimlessly looking for information about a vehicle of interest that doesn't exist.

MOTOROLA SOLUTIONS

KEY PRODUCTS AND FEATURES

RECORDS MANAGEMENT SOFTWARE

Simplify case management and close cases faster with a secure, integrated records system in the cloud. With CommandCentral Records, auto-populate a consolidated incident record with data from across systems, saving time and creating a more comprehensive case view. This gives officers time back in their shift and builds a stronger case, faster for investigators.

LICENSE PLATE RECOGNITION

Go beyond basic searches and hot list alerts with a true vehicle location intelligence solution. Vigilant PlateSearch empowers your team with plate and location-based searching as well as patented analytics, along with interagency hot list management and cross-device alerts. Stay in full control of your data retention, sharing, users and cameras - all from one, secure place.

GENERATE NEW VEHICLE LEADS WITH MOTOROLA SOLUTIONS

We're reimagining the world of policing. Our mission-critical ecosystem unifies video, software and communications on a single platform to amplify collaboration and connectivity between technology and teams. By seamlessly integrating records management and license plate recognition software, we're helping ensure investigators have quicker access to the insights needed to close cases. Because when everything and everyone works together, safety is unstoppable.
