

VideoManager EL CAD & RMS integration

Once your officers have captured evidential video on their Motorola Solutions body cameras and in-car video systems, they need a place to organize and share it. That's why VideoManager EL is so crucial to your agency's workflows: by adding external media and metadata to a case, and protecting sensitive information with redaction, you can present the strongest possible evidence to the judicial system.

Now, VideoManager EL makes it even easier to ensure that no piece of footage is left behind, by presenting an easy way to link information from your Computer-Aided Dispatch (CAD) and Record Management Systems (RMS) with your evidential video. Whether you're using a Motorola Solutions platform or working with a third party provider, you can efficiently build a more complete case in a single click.

A purpose-built interface, designed for intuitive use

VideoManager EL's integration manager aims to reduce the need for additional training by presenting a simple and streamlined interface for linking CAD and RMS data with events.

Assemble cases more quickly and accurately

Your officers should be keeping their community safe - not sitting at a desk. By connecting to your CAD and RMS solutions directly, VideoManager EL simultaneously minimizes your officers' workload and the risk of misattributed or lost events.
